

People might say “a single tree  
isn’t going to make a difference  
to anything”....

But they would be wrong.

In one year one tree cools the air  
like 10 air conditioners running  
continuously.

In one year one tree absorbs 3500  
litres of stormwater.

In one year one tree filters 25kg of  
pollutants from the air.

In one year one tree filters 25kg of  
pollutants from the air.
